Profile Summary

A skilled programmer with **5+ years** of comprehensive experience in both Backend and Frontend development, specializing in **Java, JSP (JavaServer Pages), and Spring Boot**. Driven by a passion for coding since college, I consistently deliver high-quality and efficient results. Proven ability to develop complex projects, such as medical data management and Human Resource Management (HRM) systems, coupled with strong skills in providing technical consultation and effective problem-solving for development teams.

Work Experience

Sr. Programmer | Entronica Co., Ltd.

May 2024 - Present

- **Developer Role:** Led the design and development of Backend systems using **Java Spring Boot** for new API development and system implementation to support complex operations.
- **Backup Consultant Role:** Acted as a technical consultant for the team, analyzing complex technical issues to ensure rapid problem-solving and enhance overall team productivity.

Project Management Office | INTERNATIONAL RESEARCH CORPORATION

November 2023 -

April 2024

- Oversaw and controlled software delivery to meet deadlines and ensured rigorous quality assurance.
- **Coordination Role:** Served as the central liaison between **Vendors and Clients**, facilitating communication and coordination to ensure all project phases proceeded smoothly and met the requirements of both parties, significantly **reducing the risk** of project delays.

Full Stack Web Developer | myHR Corporation Limited

June 2021 - November 2026

- Developed and designed the HRM (Human Resource Management) system, covering both Backend and Frontend.
- **System Design & Coordination:** Collaborated with the Presale team to gather requirements and refine the system based on User/Client needs. Involved in preliminary **UX/UI design** and **database design/maintenance** for system efficiency.
- **Technology & CSC Framework:** Utilized **JSP (JavaServer Pages), AngularJS, and JavaScript** with **CSCframerwork** (a proprietary in-house MVC framework).
- **Database Model Architecture (XML):** Leveraged **Java with XML**, using **XML files** to define the **DB Schema** and **Models**. This architecture served as the middleware linking the Frontend

and Backend to the **PostgreSQL** database.

Programmer | Supreme Produx Co., Ltd.

December 2018 - May 2021

- **System Design & Client Management:** Contributed to **UX/UI design**, database management, and gathered requirements directly from clients **on-site** to align the system with real-world operational needs.
- **Ambulance Camera Monitoring Program:** Developed a system using **C#/.NET Framework** to display **Real-time** data (camera, GPS, vital signs), enabling precise assessment by emergency teams.
- **Queue Management Program:** Created a patient queue system with urgency prioritization and audio/visual alerts to reduce hospital wait times.
- **Tele Pharma Program:** Built a video-call platform for pharmacists to transmit patient/medication data between hospitals, ensuring accurate consultations.
- **EMS Bot & Chatbot Program:** Developed video communication and automated chatbot systems (text/voice) to expand user communication channels.

Administrative Officer / IT Support | Thonburi Commercial College

May 2017 - November 2018

- Served as **IT Support** for 6 months before transitioning to managing research projects and official documentation, enhancing administrative skills.

Loan Officer | Thai Credit Retail Bank

March 2016 - April 2017

- Advised on loan products and managed debt portfolios, gaining experience in **customer communication, persuasion**, and relationship management.

Technical Skills

Category	Skills
Expert	Java, JSP (JavaServer Pages), JavaScript, HTML5, CSS, Bootstrap
Intermediate	Spring Boot, C#/.NET Framework, React
Basic	Python, NET Core MVC, AngularJS, React Native
Databases	SQL, MySQL, PostgreSQL , Oracle
Tools	Git, Adobe Photoshop, Adobe Illustrator (for UX/UI design)

Soft Skills

- **Problem-Solving & Consultation:** Ability to analyze and resolve complex issues quickly, serving as a reliable technical consultant for the team (Sr. Programmer).
- **Communication & Client Management:** Strong interpersonal skills, cheerful, excellent team collaboration, and proven experience in client communication, persuasion, and relationship management.
- **Attitude:** Quick Learner, Patient.

Education

- **Bachelor's Degree (2016-2018):** Information System | Rajamangala University of Technology Phra Nakhon
- **Higher Vocational Certificate (HVC) (2014-2016):** Business Computer | Thonburi Commercial College
- **Vocational Certificate (VC) (2011-2014):** Business Computer | Thonburi Commercial College
- **Lower Secondary School (2008-2011):** Pothisarnpittayakorn School
